

# ENEVA

**ENhance Efficacy through VAlorisation**

**LIFELONG LEARNING PROGRAMME**

**KA4 Multilateral Project Agreement n. 2007-1996/001-001**

**Prof. Mariapia Viola Magni**

**TUCEP Consortium**

# Project background

- Many projects were developed during the last 10 years in the field of education and research, but few remain of the results obtained.
- This fact represents a big loss not only of information, but also of money used for supporting these projects
- It is therefore obvious that the European Community considers with particular attention this problem.

# Possible reasons

- **Some projects do not correspond to real needs**
- **The dissemination is not efficient**
- **The results are available for short time**
- **The direct targets are not involved**
- **The stakeholders are not informed**
- **Absence of sustainability**
- **The results are not tested adequately**

# Aims

- **To identify strategic actions for implementing the impact of the project results**
- **To implement their valorisation**
- **To favour their sustainability**

# Creation of logic matrix

- Organise a presentation of project according a specific matrix
- Identify the principal orizontal and vertical mainstreaming
- Develop a model for the valorisation of project results
- Establish the methodology for dissemination

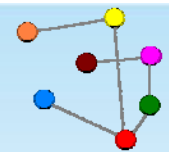

# The disability

- We choose this sector since many results are not known.
- Relatively niche sector
- Specific topics and characteristics
- The necessity to develop a common language
- The impact on stakeholders

# Objectives

**We intend to present these projects in order to increase the level of sensitivity and attention in the political authorities responsible of the rules and of the organisation of life support**

# Programme

| Task name                                    | 2007                             |     | 2008 |     |     |            |                |     |     |     |              |     | 2009 |     |     |     |     |     |     |     |     |     | Partners |     |              |    |

| Exploitation                                 |                                  |     |      |     |     | [Teal bar] |                |     |     |     |              |     |      |     |     |     |     |     |     |     |     |     |          |     |              | P1 |

**I° meeting**                      **II° meeting**                      **III° meeting**                      **IV° meeting**    **final meeting**

# Specific actions

- **Rethinking project classification options**
- **Logical framework based on useful description and indicators in the disability sector**
- **Use of language and definition easily comprehensible by the disabled and by the operator**
- **Easy use also for stakeholders**

# ENEVA portal

- **Creation of Web tool – Eneva Portal**
- **Insertions of about 80 projects according to the logic established**
- **Easy consultations and clear valorisation of the results**
- **Publication of an handbook**

# Dissemination

- **Organisation of 9 national meetings in the country of the partners**
- **Presentation of the project to the target groups**
- **Involvement of politicians and national agency**

# Valorisation

- Rethinking the valorisation concept during the meeting
- Involvement in the discussion other partners and national agency
- Try to establish possible set of indicators
- Try to see the correlations between dissemination, sustainability and exploitation

## SHORT-TERM GOALS

The estimated impact of the project during the funding period could be described in terms of contacted entities:

- 80 project & coordinators
- 30 major institutions responsible of policies in favour of integration of persons with disability (about 6 for each country);
- public and private entities, National Agency entities working in the third sector as part of policies associations of disabled people

# LONG-TERM IMPACT

## 1. Documentation and availability

The impact on decision makers at level of regional/local

## 2. Prototypal action (considering both methodology achievements in valorisation evaluation and the activities undertaken) in the field of valorisation of project results
